Last Night For Rotary Carnival

Yes, it's one more big night at the Rotary Carnival. Tonight (Thursday), July 30th., there will be plenty of action at the Minden Arena.

Headlining the evenings entertainment is a five card boxing match and the great western and Country singer Joe Nicholson

Along with these two outstanding features, the Rotary Club will hold a log sawing contest and many draws including the big draw for a 25" colored television, first prize; a 21" portable television, second prize and a transistor radio for third prize.

In the first bout of the 5 card boxing match Ted Jones will take on Mark Greir, in the sec-

ond bout Collin Hewitt will face Ken Jones, in the third match Keith MacIntosh will go against Barry Shaw, and in the final bout Kirk Hewitt will face Peter Fairey. Make sure you are at ring side at 8:00 p.m. to take in the fight action.

Joe Nicholson will perform at 9:00 p.m., singing all your favourite hits.

Besides the entertainment mentioned above, the games of chance will be in operation at 7:00 p.m., along with all the rides on the mid-way.

Come one and all for the final night of the Rotary Carnival, it promises to be a big night, full of fun for you.

Accidents Mar Holiday Season

The Minden Detachment of the Ontario Provincial Police have been working night and day, with the great number of accidents in the area.

Every year it is the same story, too many people, going too many places, at too great a speed. Thousands of dollars are lost every year through car accidents and damage caused from accidents.

Haliburton County has always been prone to accidents, due to hilly and windy roads, and of course too much haste to get to ones destination.

Here we report just a few of the mishaps over the last week.

William Marshall Lytle, 17, and Bruce Harold Thompson, both of Mississauga, were treated and released from the Minden Red Cross Hospital, Sunday, after a small foreign car driven by Lytle came into collision with a parked car owned by Nola Danilko of RR 1 Minden, and then rolled backwards into Lake Kashagawigamog at Ingoldsby.

Police report the Lytle vehicle came over a hill and into collision with the parked car and then rolled backwards into the lake, at 4:45 p.m. Sunday. Thompson was a passenger in the Lytle vehicle.

Damage to the Lytle vehicle was estimated at \$1,090 and the Danilko vehicle sustained an estimated \$500 damage.

Provincial Constable Mike Legge of the Minden detachment investigated.

A car driven by Edward

Johnson 37, of Preston Ont., received an estimated \$500 damage in an accident on County Road 6, 10:20 a.m. Friday. Police report Beverley Starr, 37, of RR 1, Little Britain was also involved in the accident but her vehicle was not damaged.

Douglas Hugh Webster, 81, William St. S. Lindsay was the driver of a car that went off Highway 35, two miles south of Minden Friday. Const. Mike Maher investigated.

Minden detachment OPP investigated numerous accidents over the weekend many of them involving just one car.

A van driven by Bruce Campbell of Toronto went off the Blairhampton road near Hwy. 35 at 5:57 p.m. Friday, causing \$250 damage. Const. R. Telford investigated.

Glen Ian MacKay of Clarkson was charged with careless driving after his vehicle went off the North Kashagawigamog Rd. at 9:10 p.m. Friday. Damage was estimated at \$300. Const. Tom Boyce investigated.

Damage totalled \$700 when

two convertibles collided on the Denna Lake Road at 6:32 p.m. Saturday. Drivers were John Henry Newson of Minden and John Edward Landon of Willowdale. Const. R.J. Wood investigated.

A car driven by Thomas Warren Latchan of Agincourt received \$400 damage when it went off Boshkung Lake Road at 7:50 p.m. Saturday. Const. R. J. Wood investigated.

Brian Herbert Ashley of Woodstock was charged with careless driving after his car went off Hwy. 121 at 10:30 p.m. Saturday. Damage to his car was estimated at \$2,000. Const. Tom Boyce investigated.

A small imported car received \$900 damage when it went off Hwy. 519 at 11:30 p.m. Saturday. Driver was Brian John Wilson of Willowdale. Const. R. Telford investigated.

Damage was estimated at \$500 when a car driven by Daniel Patrick Riordon of Mississauga went off Hwy. 35 at Carnarvon Sunday afternoon. Const. R. V. Telford investigated.

COULDN'T SWIM - TORONTO MAN DROWNS NEAR KINMOUNT WHILE ON VACATION

A 30 year old Toronto man, Martin Roy Gillis, was pronounced dead from drowning after a swimming mishap at lower Black Bay of Crystal Lake about 4 p.m. Thursday afternoon. His wife who had been swimming in the area with him, was treated for shock at Minden Hospital.

Police said they were called to the accident scene on Crystal Lake, 10 miles east of Kinmount to find one male person being given artificial respiration. This was continued for an hour to an hour and one-half until the Fenelon Falls ambulance arrived.

rived.

The man and his wife were swimming outside the cottage area, about 30 feet from shore, when the man reportedly went under in about 20 feet of water and failed to surface. Several attempts were made to dive down for him but the water proved to deep. Kent Hilburn, of New York State, wearing flippers and a mask, finally succeeded in diving to the bottom and managed to pull the body out of the water.

Provincial Constable Don McKay of Cobocok detachment, is investigating.

TWO FOUND DEAD AT FLETCHER LAKE

The deaths of two cottagers, Mrs. Rose Popovitch, 69, of RR 1, Rodney, Ont. and Mrs. Mary Lee, 73, of 2157 Deyn Court Dr. Burlington, in a cottage owned by the Popovitchs and located at the north end of Fletcher Lake, 47 miles north of Minden, is being investigated by officers of the Minden detachment of the Ontario Provincial Police.

Police report, Dr. Frank Popovitch Jr. son of the deceased woman, went to the cottage about 6:40 p.m. Wednesday July 22nd. Upon entering the cottage he found Rose Popovitch, his mother and Mary Lee, his mother-in-law dead, and his father Frank Popovitch Sr. unconscious but still alive.

Frank Popovitch Sr. was taken to the South Muskoka Hospital in Bracebridge where his condition is reported as fair.

It is not known how long the two women had been dead, but police believe asphyxiation from propane gas to be the cause of the deaths.

An official of the fuel safety section of the Department of Energy and Resources has been called in and is investigating.

Coroner at the scene was Dr. H. E. Good of Haliburton.

Provincial Constable M.J. Maher, and Corporal D. R. Stevens of the Ontario Provincial Police, Minden detachment are investigating.

ROTARY ROCK FRIDAY NIGHT

The "Rotary Rock", dance, sponsored by the Minden Rotary Club, in conjunction with the Carnival will be held this Friday evening, July 31st., at 9:00 p.m. at the Minden Public School.

The "Scarboro Fair" an outstanding rock group will be on hand to play all the swinging music of the jet age. Admission is only \$1.50, so make it a date, don't be a square — do your own thing, at the Rotary Rock.

DWELLINGS

Ideal retirement home across the road from the I.G.A. One bedroom, bathroom, living room and kitchen. Reasonable taxes. Price \$5,500.00.

SOUTH LAKE — Ranch Style with 4 bedrooms, 2 baths, panelled living room and modern kitchen. 175' frontage on lake. Boathouse. Price \$27,900.00

FREE BROCHURE ON REQUEST

HERE AND THERE

with Fenwick Finch

First of all I'd like to thank everyone who has so kindly telephone me asking about my wife's condition — it's to be hoped that with so many pulling for her she will make a good recovery. As usual, whenever I get in a jam everyone at the Red Cross Hospital does everything they can to make things easy. My second meeting with Dr. Palmer may have been a little strained as he was routed out of bed about 4:30 Sunday morning. However it didn't seem too upsetting to him, he took over and was very calm and reassuring.

* * * *

You have only to spend a little time at our local hospital to realize how important a spot it is. The tourists in particular should be happy with the situation — you'd be amazed at the number and varied cases that are brought in. Fish-hooks in various parts of the body — water skiers who fell by the wayside — car accident victims and so on — it's a wonder to me the Doctors can stand up to it.

* * * *

As you go through life you meet people who fit into a peculiar category, somewhere between acquaintance and friend. These people are cheerful and outgoing and it is a pleasure to have visits with them. Such a man was Alex Taylor, I used to enjoy our meetings, sometimes we'd talk about his car, sometimes about the farm, sometimes exchange a joke or two, none of our subjects were earth shattering but I always left Alex feeling that the day looked a little better. I'm sure going to miss him.

* * * *

My good friend Clayton Rogers 'phoned me to say he appreciated being mentioned for his work at the 12 mile "water hole" but he felt credit should go where it's due. In the past three years Ross Harrison of Carnarvon has taken over Mr. Rogers' job and is doing a beautiful job. Sorry about that Ross, however I hope this fixes it for my oversight.

* * * *

That's about it for now, it's been a hectic weekend for me and I'll have to get my material sorted out for next week. In a letter from G. and E. F. I got a couple of little stories. This one about the motorist I thought was quite good and seemed like a pleasant way to finish the column.

"After travelling several miles behind a horrible, impolite driver, the man pulls even and stares at the inconsiderate motorist and says, "I decided a mile back what you are, I just pulled even so I could see what one looked like!"

* * * *

So, there you have it — drive carefully or you'll be joining the ever-increasing group at the Red Cross Hospital and, believe me, it ain't no fun.

Walter Safety says,
"Avoid playing with
air-inflated toys
and inner tubes
in the water.
Keep them on the beach
where they belong."

JEHOVAH'S WITNESSES DISTRICT ASSEMBLY

Mr. Roy Brodie, has been selected to assist in the organization of the 'Men of Goodwill' District Assembly of Jehovah Witnesses to be held in Toronto July 30 to August 2.

Mr. Brodie will serve on the staff of the convention organization in the equipment and trucking department. His duties include directing the moving of tons of equipment and supplies needed to operate the various departments at the convention site.

He described the convention as a seminar of Bible instruction for all members of the family, 'aiding them to see how Bible principles still apply in human relationships.' He said that when this is done it not only promotes goodwill among men but wins 'God's Goodwill' and that is essential for surviving the present crises that threaten man's future.

The four-day program will consist of talks and dramatic presentations. The featured public address will be 'saving the Human Race'—in the Kingdom Way. It stresses the Witness conviction that the Kingdom of God as an actual government will preserve the human family through current crises to live in a peaceful earth in the immediate future. In addition to English there will be full sessions in Italian and limited sessions in Greek, Spanish and Portuguese.

'Already there is much being done to prepare for the convention,' he reported. 'For some weeks about 3,000 volunteers have been covering the entire Metro Toronto area to list accommodation for the delegates, especially in private homes. The commercial facilities have not been sufficient to take care of so many persons.' Requests for rooms have come from most provinces and from 33 states.

The volunteer-worker arrangement also staffs the convention's twenty-one departments, ranging from cafeteria to first aid to lost and found. All have been found necessary to look after the many needs of the 16,000 expected to attend.

Mr. Brodie began serving as an ordained minister with the Witnesses in 1940. He presently serves as a circuit supervisor of 14 congregations in this area. In the past his work has taken him to Alberta, Saskatchewan and Manitoba.

After the convention and a brief vacation he will be taking up a new assignment in Southern Alberta, visiting congregations there to train witnesses in their Bible educational work.

FISHIN' FACTS

BY BOB HAWTHORNE

THE ROLL CAST

A useful cast that every fly fisherman should know is the roll cast. This is used when there are obstructions behind you, leaving no room for the conventional back cast. The roll cast is relatively easy to master, and is actually the only practical cast in "tight places".

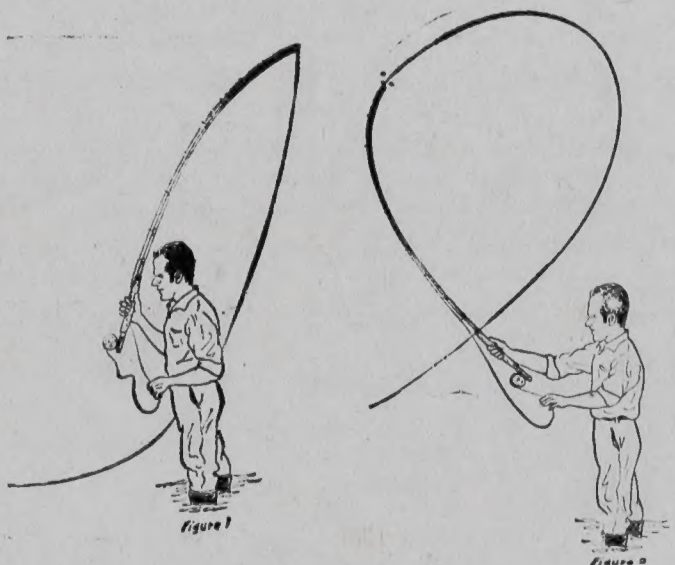

The hardest part of the roll cast is getting enough line out in the first place so that you can proceed to the next step. The best way to do this is to hold the butt of the rod up high, the tip of the rod low, and strip off about 15 feet of line. Twitch the rod tip back and forth, and at the same time feed the line through the guides with your left hand.

Once the line is out in front of you on the water, you can then proceed to roll the line out in any direction you wish. To begin, pull the line toward you by raising up on the rod and bringing it back to approximately the one o'clock position. This will force the "belly" of the line into an arc position on the surface of the water (Fig. 1).

Next, apply power by bringing the rod forward using your forearm and wrist. Stop the rod motion at approximately the ten o'clock position. This will force the line to roll out in front of you on the water. (Fig. 2).

The important thing to remember is to use enough power application when you bring the rod forward so that the line will roll out easily. Should you wish to roll cast farther, simply strip off additional line from the reel and repeat the above procedure.

Once you have mastered the fundamentals, it is a simple step to change direction of the cast. If you want to cast to the right, bring the rod back to the left and force the rod tip down to the right. Should you wish to cast to the left, bring the rod back to the right and force the rod tip down to the left. Release the line as soon as you have completed the forward motion of the rod.

Your most useful servant can cripple or kill you.

Tractors, combines, balers, corn pickers and other machines have made farmers much more efficient.

But the increasing use of machinery has been paralleled by a frightening increase in farm accidents.

- More Canadians are killed in farming than in any other single industry.
- The accident rate on farms is 20% above the national average.
- Accidental deaths involving farm machines have doubled over the last 10 years.
- 20% of all persons killed in farm accidents are under the age of 10.

But machines do not cause accidents. Farmers do.

- Less than 5% of farm accidents are caused by mechanical failure.
- More than 93% are caused by carelessness.

A thoughtless act, refusal to use safety features like tractor roll bars and power take-off shields, and allowing children to operate, ride on or play near machinery are among the principal causes of farm accidents.

July 25th to 31st is Farm Safety Week and your Workmen's Compensation Board urges you to farm safely this week and every week.

Farmers Covered by the Workmen's Compensation Act

All farm employees have been compulsorily covered by Workmen's Compensation since 1966 and more than \$7,000,000 has been paid in compensation and medical aid benefits.

Farmers desiring information about the Act should mail this coupon.

ROTARY CARNIVAL

The Rotary Carnival here in Minden is in full swing — that is to say, we have one more big night for all those who are interested in stepping out for an enjoyable evening.

This Carnival is one of Minden's biggest fun events of the year, equalled only by the Minden Winter Carnival and the Agricultural Fair, which comes up next month. As Chairman for the past four years, it has been great fun, staging this Carnival. It is always a pleasure working with the other members of Rotary, who donate their time and energy, to help make the Carnival a success. A vote of thanks must also go to those interested citizens who are not members of Rotary, but donate their time to assist the club in many ways. And of course what good is a Carnival without people? Over the years the people here in Minden and surrounding district, along with the cottagers have been just great, in their support to this annual event. I haven't got the exact figures but there are close to four thousand people attend the Carnival each year — one can't ask for better support than that.

The Carnival probably serves many purposes, for many different people, but for the Rotary Club of Minden, it is one of the best ways the club has to raise funds to meet the many obligations it takes on over the year. Every cent which is made at this Carnival goes towards this community in one way or another. I can think of many students it has helped through University — there are many people who are handicapped, which the club has spent money and time, helping. Throughout the year the Rotary Club is called on to assist families who are in need, due to misfortunes of one kind or another. The money made on this Carnival is always available to such needed causes.

The Carnival runs again tonight (Thursday), plan to attend, there is entertainment for everyone.

POLLUTION PROBE

Pollution! — A nasty word? If people are not careful, water pollution could put an end to the Southern Haliburton Tourist industry in as short a period as ten years.

Pollution Probe at the University of Toronto has a team of pollution educators in the Haliburton Highlands area through July and August of this summer. They are one of seven teams touring the cottage districts of Haliburton, Muskoka, Parry Sound, Bancroft, the Kawartha, Georgian Bay and the Ottawa River Valley, speaking to summer camps, cottage associations and municipalities about the dangers of and remedies for pollution and what the role of individuals can be.

Stan and Judith Zlotkin, Probe's Haliburton region representatives say that water pollution could be a threat to the tourist industry in this area for a number of reasons: too many people in too small an area, can cause excessive pollution; old or improperly installed septic tanks can pollute a lake to a great extent in a very short time; high nutrient concentration from high phosphorus detergents can take the oxygen from a body of water in a matter of a few years.

The battle against pollution must be faced. It really is a great threat to our very existence and it is only through involvement and determination that the problem can be dealt with.

WATER SKIERS OFTEN NEED SPECIAL BOAT PROPELLER

Selecting the correct propeller for water skiing seems to be a big mystery for outboard owners. It doesn't have to be, reports Marcel Brier, chief engineer at Johnson Motors, in Peterborough.

According to Mr. Brier, if you follow a simple test procedure and keep track of a few facts and figures, you can find the right prop for your rig.

When you purchased your outboard, it was equipped with a "standard" propeller. This was designed for best performance on an average boat carrying an average load. However, it may not be the best prop for your particular rig, and this especially true for skiers.

Skiing demands instant thrust to pull a skier to the surface. The need for initial power multiplies as you move up to two or three skiers at one time. Some standard props just aren't designed for this activity. But all is not lost. Your marine dealer has a list of alternate props, and he can help you select two or three that will do the job. Johnson Motors offers a choice of propellers at time of purchase on its motors from 33 horsepower through the 40, 55, 85 and 115 horsepower range.

However, for the boatman who is looking for the proper water skiing propeller for his present motor, the correct may be chosen by running on-the-water tests. A tachometer is needed, to measure the engine rpm's. Don't try and remember performance data — you won't — so bring along a notebook and pencil.

When conducting tests be sure you're running under normal conditions. This means you will need a skier or skiers to help out.

Your owners manual lists a recommended rpm range for your outboard. It will probably be between 4,500 and 5,000. At full throttle, check the tachometer. If the engine is turning less than 4,500 rpm's, you've got the wrong prop. Try another. Your search is over when you find a prop that allows the engine to turn its rated rpm's, when pulling skiers.

Some ski props will make the engine turn faster than its rated rpm's when running light. Providing you're only 200 or 300 over the maximum, you should not have any trouble. Just remember to retard the throttle slightly when not pulling a load.

Once you've found the right prop, keep it in good repair, says Brier. At least twice a year, have a marine dealer check it for proper pitch. If it becomes bent or nicked, replace it.

MINDEN MINOR LEAGUE BALL ACTION

The Minden Minor Ball Executive have decided that they will take a seventh inning stretch — next week all teams will take a week off. There will be no ball.

The reason for this, is the poor turn-outs each team has been having over the last couple of weeks. It is felt that if the teams have a week off, during this hot spell, more interest and participation will be shown the following week.

Remember all teams will swing back into action Saturday, August 8th. Lets see everyone on deck ready to finish off the schedule.

It has been very disappointing for the executive who have spent a great deal of time and money to have such poor turn-outs to the games. It is also disappointing for the players who show up each week, and find there is not enough players to make-up a team. At the start of the season some 100 boys signed up to play — where is the interest gone?

LAST WEEKS RESULTS

In the Novice division the Tigers beat the Expos 24 to 8, moving them up into a tie with 6 points each.

In Pee Wee play the Dodgers walked over the Mets 16 to 3.

Remember-
only **YOU** can
**PREVENT
FOREST FIRES**

The Yankees and the Giants played to a 5 - 5 tie.

In the second game of the double header the Dodgers shut out the Giants 7 to 0, while the Mets downed the Yankees 7 to 0.

The Bantams were rained out.

CAMP KANDALORE

CANOEISTS TAKE JOURNEY

On July 12th, the Explorers of Camp Kandalore, at Ox Narrows, set out on a long journey in the Voyageur canoes each twenty-six feet long.

In addition to pagents, which will take place at Fort Alexander, Lower Fort Garry and Winnipeg, they will participate in a ceremony at Thunder Bay to mark the unveiling of a monument to the 'Voyageur'. The celebrations are part of the activities related to the One Hundredth Birthday of Manitoba.

This journey is an extension of Kandalore's participation in the National Canoe Project which took place in 1967. At that time the Camp undertook to cross Lake Superior in the same canoes and, further, to paddle from Kenora to Boundary Island in the Winnipeg River in regular sixteen foot canoes.

A film of the journey is being produced and could be made available to schools and other interested organizations.

SECOND HOLE IN ONE AT BLAIRHAMPTON

The second hole in one of the 70' season was recorded at the Blairhampton Golf Club on July 23. The lucky player was Dr. M. McCulloch of Oakville using an 8 iron on the 164 yard par 3, 6th. hole. The shot was witnessed by Mrs. McCulloch and Mrs. Ruth Pepall.

AROUND THE BASES

with the "BEAGLE"

The schedule for this season is nearly over, Minden has only one league game remaining. This one will be played Thursday, July 30th., 7:00 p.m. at the Fairgrounds, against Haliburton. The change in dates was necessitated by the Rotary Carnival.

With the top three positions still undecided it was important for Minden to win every game last week. Of the four games played, the local team won three. A victory Thursday against Haliburton will clinch the pennant for Minden.

Last Weeks Games

Haliburton 2 Minden 0

A combination of defensive lapses by Minden and an inability to hit Haven Cook consistently, spelled defeat for Minden. Held to a random three hits, Minden was not able to mount an offensive to overcome several glaring errors. Jack Snell was the loser for Minden.

Minden 10 West Guilford 5

This was a must game for Minden, if the locals were to have any chance at a shot for first place. The big difference in the game seemed to be in pitching. Craig Stamp for Guilford didn't have his usual stuff. This combined with Guilford's lose defensive play enabled the Minden club to take another easy victory. Gene Newell started for Minden but was relieved by Jack Snell in the late innings. Ken Lewis homered for Guilford. Tony Salvatori umpired.

Minden 13 Irondale 11

In the first of two Sunday games against Irondale, Minden umped into an early 9 - 0 lead. However Irondale seemed to play its best ball against Minden, Bounced back to make it 9 - 6. Minden once again took the lead at 13 - 6, late in the game. Irondale however played hard coming back with four more runs to round out the scoring. Fine relief pitching by Snell in the late innings assured Minden of the victory. Bob Austin was Minden's big gun hitting 5 for 5. Ron Campbell homered twice for Irondale and Craig Morrison homered for Minden.

Minden 6 Irondale 3

Again Minden had trouble with the Flyers at the end of 3 1/2 innings, Irondale led 2 - 0. A two run homer by Morrison tied the score but Irondale was not to be denied and surged ahead 4 - 2. A run by Minden in the bottom of the sixth brought the score to 4 - 3 and set the stage for one of the most dramatic finishes in years.

Neil Burk hit his first homer of the year, a long drive into right centre. Then with one out Dave Dollo beat out a ground ball to set up the winning run. Bob Austin then hit his first home run of the year into deep left, bringing in the winning runs. For Minden Jack Snell was the winner. Hugh Fountain was the losing pitcher. Sound defensive play by Morrison, Garbutt and Austin helped assure Minden of the victory. Doug Heath was the umpire.

Don't forget the game Thursday night.

DOLLARS AND GOOD SENSE

by William J. Martin

This column is a regular feature prepared by the Family Financial Counseling Service of the Avco Delta Corp., P.O. Box 2820, London, Ontario. All questions submitted to the above address will be answered in print or by mail. Names will not be used in print. However, all questions should be accompanied by a complete name and address.

\$\$\$

Dear Mr. Martin:

A friend of mine recently bought a TV set. Even though he had enough money in the bank to pay for it, he borrowed the money to make the purchase. Why would he do such a thing?

Mr. F. C. C.

Dear Mr. F. C. C.:

Borrowing against your savings may seem odd, but it can be a convenient and economical way to borrow a fairly large sum for a short period of time.

If your savings are in an account that compounds interest quarterly, you stand to lose the interest if you withdraw funds before the quarter is over. By borrowing and using your savings to do it, you can leave your savings where they are: until you receive the interest, then withdraw enough to repay the

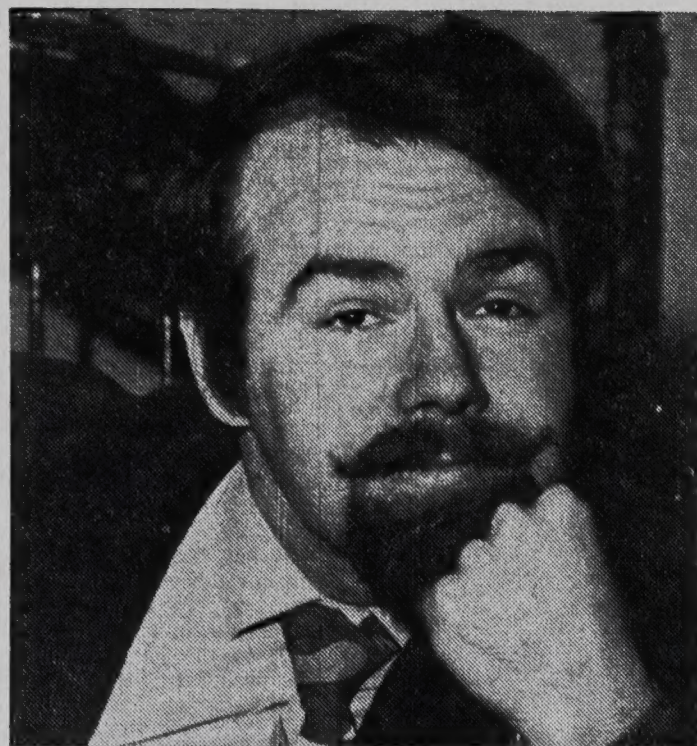

loan.

Even if your savings account earns interest from the day of deposit to the day of withdrawal, the passbook loan is still a good method of borrowing, and loan interest rates are generally lower than ordinary installment purchase rates because the lending institution has the best of all securities — your ready cash that can't be touched until the loan is repaid.

But keep in mind that rates do vary even with this type of loan, so it pays to shop around and check with various lenders, from banks to finance companies, for the best buy.

The passbook loan is probably the fastest and most convenient to get so keep it in mind when you need large sums of money for short times and have the savings on hand in a bank or savings and loan institution. Whether or not your money is earning interest on a daily basis or a quarterly basis, it's a good way to get a loan in a hurry with low interest, and it keeps your hard-earned savings in tact.

It's always easier to repay a loan than to repay yourself and rebuild your savings account.

SUMMER SUPPLEMENT

The man behind the beard is Jim Robertson, host-interviewer for Summer Supplement, CBC radio's on-air version of a Sunday paper, heard Sundays at 10:03 a.m. Supplement features interviews, reviews, mini-documentaries, humor, indepth probes of topical issues.

DAMAGES \$1,600 IN

AUTO CRASHES

Damage was estimated at \$400 when a small car operated by Joyce Pinke, 46 of Scarborough, rolled over on Hwy 121, a mile east of Minden at 5 p.m. Tuesday. No injuries were reported. Const. Douglas Heath investigated.

Utility truck owned by Henderson Well-drillers of Lindsay and driven by Terence Gordon Graham, 21, of Woodville, sustained about \$600 damage when it went into a ditch on Hwy 35, south of Minden at 6 p.m. Const. Tom Boyce investigated.

A car operated by John Herbert Neil, 17 of Oshawa, sustained \$600 damage when it went off Hwy 7 near the intersection of Hwy 35 at 12:55 a.m. Monday. Const. Mace Armstrong investigated.

PNEUMATIC BUFFERS

GIVE TOP PROTECTION

Par-Air Pneumatic Square Buffers protect the topsides of boats even in unusual docking situations like this bow-to-moorings to a large boulder in an ocean inlet.

An important feature of the square design is that it provides four times more cushioning contact area than round fenders of the same dimensions.

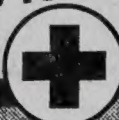

Par-Air Square Buffers are centrifugally rotational cast of tough vinyl with a shiny, smooth surface that will not scuff or mar the boats finish.

Tubular passages for line are sealed off from the air chamber and located a quarter of the length from either end. This permits the buffer to be tied vertically to a bit of a deck cleat and extend higher than the gun whale to protect the sheer molding. Hung horizontally, Par-Air buffers afford sure protection against pilings.

A football-type valve in one end allows pressure to be regulated as best suited for each mooring situation. A Par-Air inflation pump is included free with each set of pneumatic square buffers (4 of the smallest size or 2, each, of the larger sizes).

Par-Air Buffers, in pure white or jet black, are available in three sizes: 6 in. square by 26 in. long; 8 in. square by 28 in. long, and 10 in. square by 30 in. long.

MERCURY FISHING OUTBOARDS

SPACE AGE ENGINES

We're not kidding! A Merc fishing engine is SO superior in design and ahead of the field, that it belongs to the Space Age.

Thunderbolt Ignition with Maker Points — instant starts with up to 40,000 volts of power. Fastest, hottest spark in the industry.

Perma-Gap Spark Plugs — new super-tough center-electrode alloy resists spark erosion. Under normal operating conditions, Perma-Gap plugs will last the life of the engine.

Use Regular-Grade Automotive Gas — with Thunderbolt and Perma-Gap plugs, economical regular-grade gasoline is recommended.

"XX" Aluminum — a corrosion-resistant aluminum alloy that's 40% stronger than aluminum used in competitive outboards.

Add to these outstanding new features old Mercury standbys: Glide-Angle design, shearproof propeller drive; Jet-Prop exhaust, Shallow-water Slant; one-piece driveshaft and lower unit housings; Full Jeweled Power; fixed-jet carburetion; full silencing system; one-hand steering and throttle control; full forward-neutral-reverse gearshift, and you know we've got the Space Age fishing outboard.

Want to see one for real? Come on in, we've got 'em all on hand.

**GUILD OF FINE ARTS
SUMMER EXHIBITION - SALE
BIG SUCCESS**
by Nila Reynolds

During the show's 4 day run, action keyed the live demonstrations which included Mrs. Vi Hudson, a teacher of the pottery winter workshop at her pottery's wheel — Mr. Peter Nichol instructor of the Driftwood Sculpture summer course preparing a new piece — Gery Brender a Brandis of the Branstead Press doing a wood cut engraving — Mrs. Nevitt at her loom weaving — colouring skis — Mr. and Mrs. Haggart grinding and polishing the gemstones used in their jewelry — and the Puppet People, "Lily and Bill", Mr. and Mrs. William Kirkpatrick of Sprucedale whose stringed marionettes and puppets fascinated not only the very young, but the young in heart.

This years exhibition proves beyond a reasonable doubt the influence and importance of the Guild's instruction classes, both summer and winter, since many successful exhibitors are graduates of either or both. For example, Donald and Joan Foster who showed their work are weaving graduates; Alta Pavlins and Mary Capela of Driftwood Sculpture and many of the artists on display have been instructed locally. One can safely say that the school's overall purpose "to promote the practice and appreciation of fine arts and crafts, both among the inhabitants of and visitors to the Haliburton Highlands and from areas farther afield" has been achieved.

Mr. Donald Popple, recently appointed director of the School of Fine Arts, is expanding this summer's programme to include 4 new courses; Music Appreciation by Brian Jackson; a class in Colour Slides by John Walker, host of TV's "Camera Room"; Theatre Appreciation by Mr. Hartley Robinson who is directing Kawartha Summer Theatre's "Cactus Flower"; and Creative Couture Sewing by David Pequegnat, whose mother, the former Petra Boice, was born in Guilford Township.

All those connected with this summer's exhibition, the president, Mrs. Carol Duncan; the convener, Mrs. Nevitt; the director, Mr. Popple; plus the Board of Directors, the Executive and all the volunteers are to be complimented on their achievement. They have proved

Whitfield Western Tire

Highland Street

Haliburton

- Phone 457-2382

Board of Directors, the Execu-
tive and all the volunteers are
to be complimented on their a-
chievement. They have proved
that the Haliburton Highlands
Guild of Fine Arts can be not on-
ly a financial success, but one
of our County's greatest attrac-
tions and assets.

One of the most heartening e-
vents at the Haliburton High-
lands Guild of Fine Arts Sum-
mer Exhibition and Sale opening
at 8 p.m., Wednesday, July 8th,
was the presentation of awards
by TV personality Paul Soles.
These scholarships will enable
the winning students of the 3
Public School art competitions,
held throughout the schools of
Haliburton County, to develop
their considerable talents at the
Guild's Summer School where
they will receive individual in-
struction. Their work, promi-
nently displayed at the Exhibition
was the subject of much favour-
able comment. The winners
were as follows:

GROUP A:

- 1 Micheal Hatko:ki — Minden
- 2 Dianne McDuff — Gooderham
- (b) Judith Simmons — Gooder-
ham

- 3 Leslie Booth — Minden

GROUP B:

- 1 Janice Simmons — Gooder-
ham
- 2 Lorraine Packard — Gooder-
ham

- 3 Bobby McCrean — Gooderham
- (b) Linda Shickelton — Gooder-
ham

GROUP C:

- 1 Molly Rozenewajg — South
Ridge Farm.
- 2 (a) Lyndell Main — Halibur-
ton.

- (b) Wendy Wood — Haliburton
- 3 (a) Donna Emmerson — Hali-
burton

- (b) Brenda Ripley — Halibur-
ton.

- (c) Ingrid Kadoke — Haliburton
- Residents of Haliburton Coun-
ty, as well as parents and
friends of these gifted young
people should be unpardonably
proud of their achievement.

Could sponsors be found a-
mong the county's business men
or those interested in the arts,
additional scholarships might
be offered and the programme
expanded to include awards for
high school students and talen-
ted adults. If interested patrons
were to come forward with
financial aid, this might be pos-
sible by 1971.

OBITUARY

John Alexander Taylor

The community was shocked and saddened by the sudden passing of a life-long resident, John Alexander Taylor on July 17, 1970, in his 72nd year at his home in Anson Township.

He was the son of the late Hugh Taylor and Ellen Kernohan, and the beloved husband of Beatrice Grant, formerly of Woodville, loving father of Margaret, (Mrs. Reg Powell) Wayne, Norma, (Mrs. Sinclair Davies), Ruth (Mrs. Bruce Castator) all of Rexdale, Laura (Mrs. John Whyte) of Oshawa, John of Newmarket, Hugh and Kirk at home, and loving grandfather of sixteen grandchildren.

He is survived by two sisters Laura (Mrs. S. Hickey) of Lindsay and Lillie (Mrs. Harold Hogg) of Minden, predeceased by Allan and Agnes (Mrs. Alvin Hogg) of Minden.

Funeral services were conducted by Rev. Wesley Oake of Minden United Church in the John Welch and Son Funeral Chapel on Monday July 20 at 2 p.m. Interment in Minden Cemetery.

Members of Arcadia Lodge A.F. and A.M. of which he had been a member for forty-two years, and master two different years, conducted a memorial service in the chapel Sunday evening at 8 p.m.

For a number of years he had been employed by the Dept. of Lands and Forests, until his retirement in Sept. 1969, and had carried on with his farm work until the time of his passing.

Many beautiful floral tributes showed the esteem in which a good neighbour and friend had been held.

Pall-bearers were Masonic brethren Len Lonsberry, Vinton Loucks, Allan Rogers, Philip Graham, Earl Hewitt and Harvey McIntosh.

Life's race well run,
Life's work well done
Life's crown well won,
Now comes rest.

HALIBURTON MAN CHARGED FOLLOWING CHASE

A 21-year-old Haliburton village man, Wayne Armand Brown, was charged with dangerous driving by Minden OPP following a high speed police chase southerly from Haliburton late Sunday evening.

Police said chase ended when the driver lost control of his souped-up vehicle. They said the vehicle was not damaged and no injuries resulted. Speed during the chase was estimated at 70 to 80 miles per hour in a 30-mile zone.

The accused will appear in Minden court.

ABOUT THE TOWN

With Jeanne Sears

We heard and read about the cereals so much advertising and so on, that are so popular with many "give aways". It seems they just make you fat, but have no food value. With nutrition so much a factor in our children's diets, guess we will have to go back to those old fashioned cereals.

Mary and Hector Ouilette of Windsor, whom the Frank Pooles met on a visit there recently, are enjoying a holiday in our village.

The Red Cross Swimming Classes are coming to an end this week for about 100 children. These children are taken by Dave Stamp's school bus to Twelve Mile beach every day with driver Glen Stamp. Instructors this year have been Debbie Campbell, Lynn Gibson, Kerry Delaney and Jenifer Benshead. How fortunate to-days young people are that they learn not only to swim well but also learn water safety and may at some future time save a life just through taking these lessons.

Mrs. John M. Fleming is enjoying the visit of her sister Mrs. W. Whitton of New Jersey and Mrs. John L. Kennedy of Long Island.

Hint of the week — Picked up a sliver in your hand? Rub an ice cube over it and in a few minutes when the spot is numb, the sliver comes out painlessly.

We noticed that the signs are up in the stores to order cherries. Now it is the time to stock up for freezer or preserves to use later in pies or deserts.

Live theatre at the High School auditorium this coming week is "Black Comedy" with Curtain time 8:30.

Visitors with the Andy Mackenzies have been his brother and family Doreen and Bill and sons Tan and Neil of London, England. This family have just arrived in Canada and the boys are staying in the village until employment and a residence can be found in Toronto.

Mr. and Mrs. Duncan McLelland have just returned from a months visit with their son and his family at Cape Cod. Mr. and Mrs. Victor Skvyington of Bourne-mouth, England, have arrived to visit his sister Mrs. McLelland.

Patients at the local hospital on Monday included Martin Taylor, Frank Harris, Mrs. Teressa Miller, Mrs. John Packard, Master Luc Myre, Bill Little and Mrs. Norm Maidens.

Congratulations to Art Ward of Wig-A-Mog Inn, this lucky fellow won the new Pontiac car draw the Canadian Legion held a week ago. Art said it was quite a windfall. I guess so! I bet he has a ticket on the Rotary Club car draw to be held next week.

It sure has been hot and humid, this last weekend; sorry for the people who had to return to the city.

Cheerio until next week.

CAMERA CAPTURES AND INCREASES BOATING FUN WITH MANY MEMORIES

Have you ever wished you could carry conclusive documentation of your best fish story? Or that you could share with those rare and thrilling glimpses of wildlife you have enjoyed from your boat? Or that you could keep fresh the memory of the first time junior made it up on water skis?

No matter what your boating activities are, your sport is one that is filled with memories worth keeping — and one that you can make even more fun by adding a camera to your boating package, says the Johnson News Bureau.

There is an endless variety of camera outfits available for the job, from foolproof instamatics to the shutterbug's 35 mm single reflex camera with interchangeable lenses.

No matter what type of camera you have or can fit into your budget, get out and see it. Become thoroughly familiar with it and the film, so that picture taking becomes smooth and enjoyable for you. There are a couple of peculiarities in connection with marine photography that you keep in mind every time. For example, large expanses of water without reference points can make judging distances a little more difficult. Making a distant object the focal point of a photo may result in a finished picture of a mere speck. Don't be afraid to move closer to your subject.

The photographer who can adjust his lens settings tends to over expose his pictures because water reflects and intensifies sunlight. Best solution to this problem is a light meter. Without a light meter, the photographer can usually close the lens one stop beyond the land setting and get satisfactory results. Filters can also help cut down the glare.

Taking a picture from a boat in motion requires a faster shutter speed, at least 1/250 of a second. Remember not to lean against the side of a moving boat as you shoot. The motion will cause the photo to blur.

Camera and film should be kept in a dry, shaded part of the boat when not in use, and equipment can be protected with a plastic bag. Have a camera strap attached to the camera and your person. A camera left overboard is of no value to anyone.

Make sure you include people in your shots and avoid cluttered background. Simplicity is the key to outstanding composition in marine photography.

Haliburton 457-2220

by Lorna Rogers

In 1967 a program conceived and largely executed by Glenn Gould won high critical acclaim. On The Idea of North Gould used the north to illustrate different levels of solitude and how enforced solitude affects people. Forsaking the concert stage, Gould turned his genius to the radio and TV media — and with laudatory results. The Idea of North is to be repeated August 4 and on August 5, a visual version will be telecast on CBC-TV. So on two successive nights, Gould aficionados will have a chance to hear-and see-the work of this musician-turned-broadcaster.

During the recent royal tour Canada's eyes focused on the northland with an interest they have rarely shown before. Another segment of the population, largely ignored up till now, are the Acadians, the earliest settlers of the Maritimes who for 300 years have clung to the culture and language of their ancestors. Now they've reached a crossroads — do they move to the English-dominated Maritime centres, or migrate to Quebec? Soundings, August 5, takes a close look at what someone has called the attempted genocide of a people.

Now that Peter Gzowski, ex-editor of Maclean's magazine, has become disenchanted with the publishing world, he's getting more involved in broadcasting. He's currently replacing Bruno Gerussi while Bruno takes a well-deserved holiday, and the week of August 3-7 he's one of the guests on Four For Forty. He's still heard regularly of course on the weekly phone-out current affairs show, Radio Free Friday.

CBC Stage, on August 1 and 8 turns its attention to the works of two Russian writers. The first one, St. Petersburg by Andrei Bely, concerns a father-son relationship in the pre-revolutionary city. A somewhat earlier St. Petersburg (now Leningrad) is portrayed in the August 8 production of an adaptation. It is the story of a brief encounter of two very young people in the heady air of an early spring night. Both plays Norman Newton.

Include phone number.

NOW
ALL NEW
MERCURYS
GO ON

REGULAR
GASOLINE

AND
GO EASY
ON
IT

Only Mercury outboards can use regular-grade automotive gasoline and not become fouled

HOW COME?

Thunderbolt ignition and new Perma-Gap spark plugs... that's how come! Thunderbolt's spark is so quick and so powerful (up to 40,000 volts) that lead deposits are literally blasted right off the spark plug. And the new super-tough alloy used in the center electrode of the Perma-Gap plug resists spark plug erosion. Under normal operating conditions, the Perma-Gap spark plug will last the lifetime of your engine. Now you can take advantage of the wide availability, uniform consistency and low cost of regular-grade automotive gasoline. But it takes Thunderbolt ignition AND Perma-Gap plugs to do it. Come on in and check out the new 1970 line of Mercury outboards... 4 to 135 hp.
